

戒指升级卡死恢复方法（iOS）

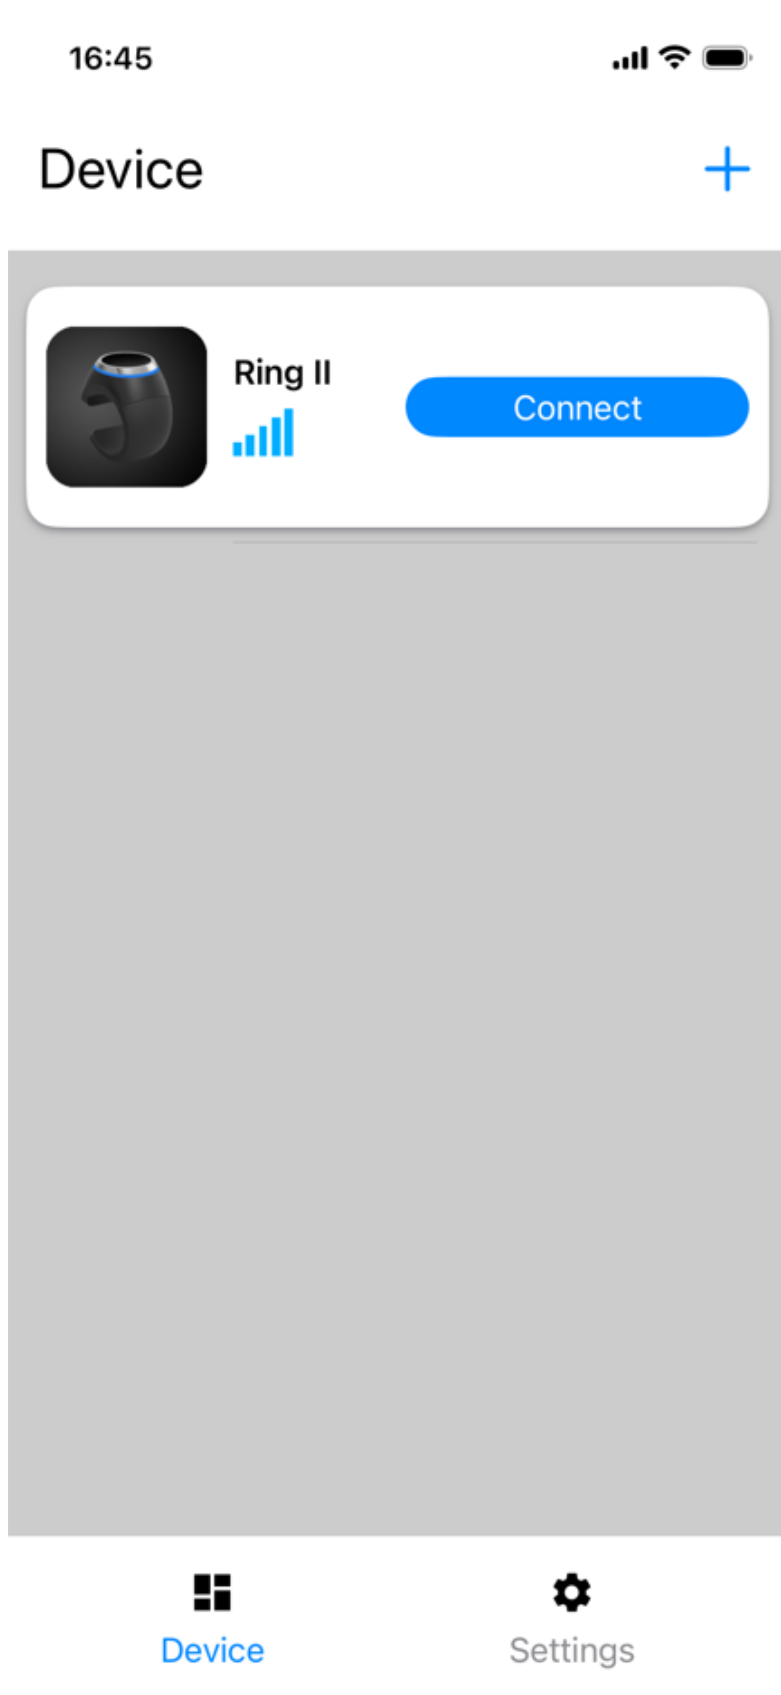

How to revive the ring after an upgrade freeze (iOS)

备注：该功能仅支持 Ctrl4U v1.8 及以上版本。

Note: This feature is only supported in Ctrl4U v1.8 and later.

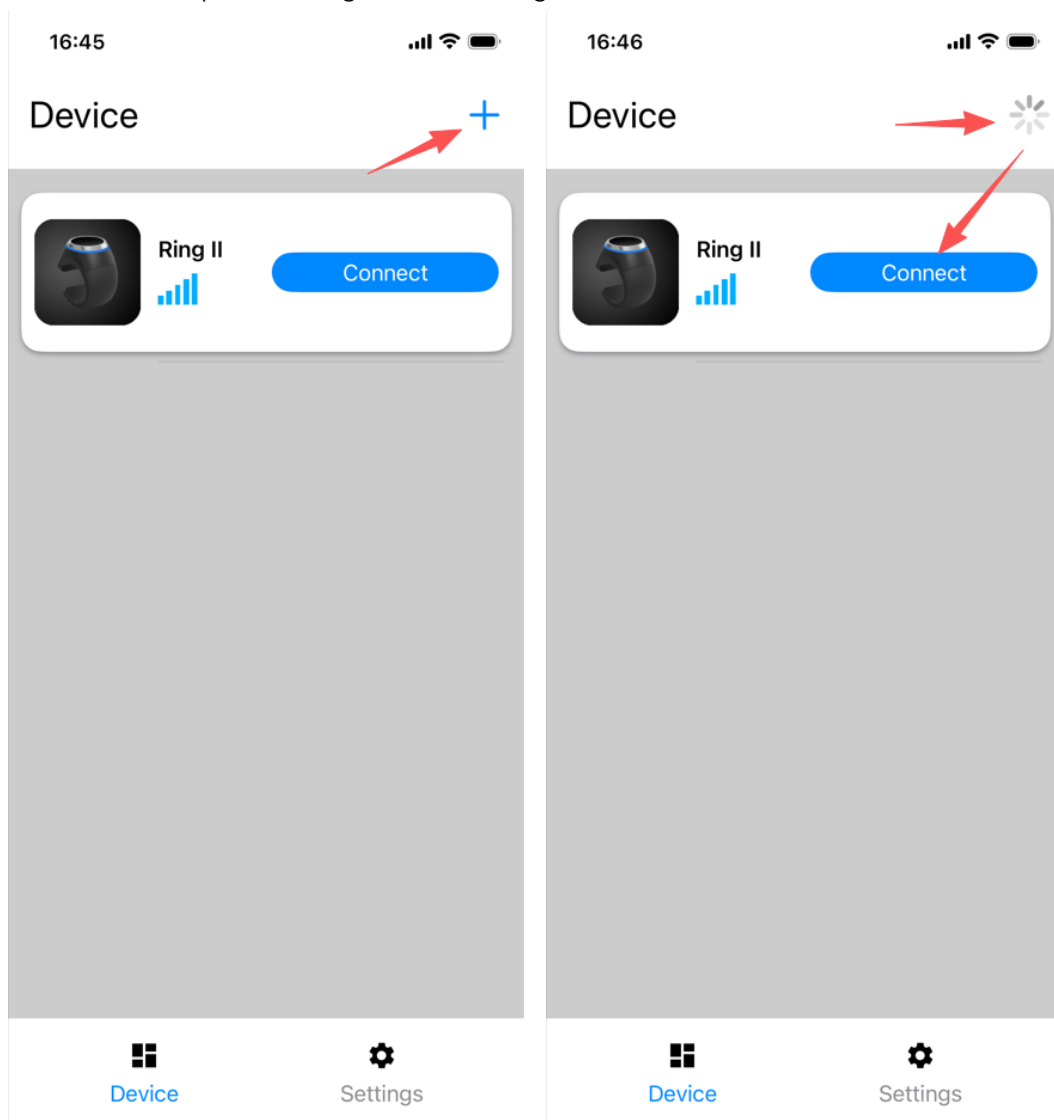

1. 返回到设备页面或退出 app 重新运行 app。
Return to the device page, or close and reopen the app.

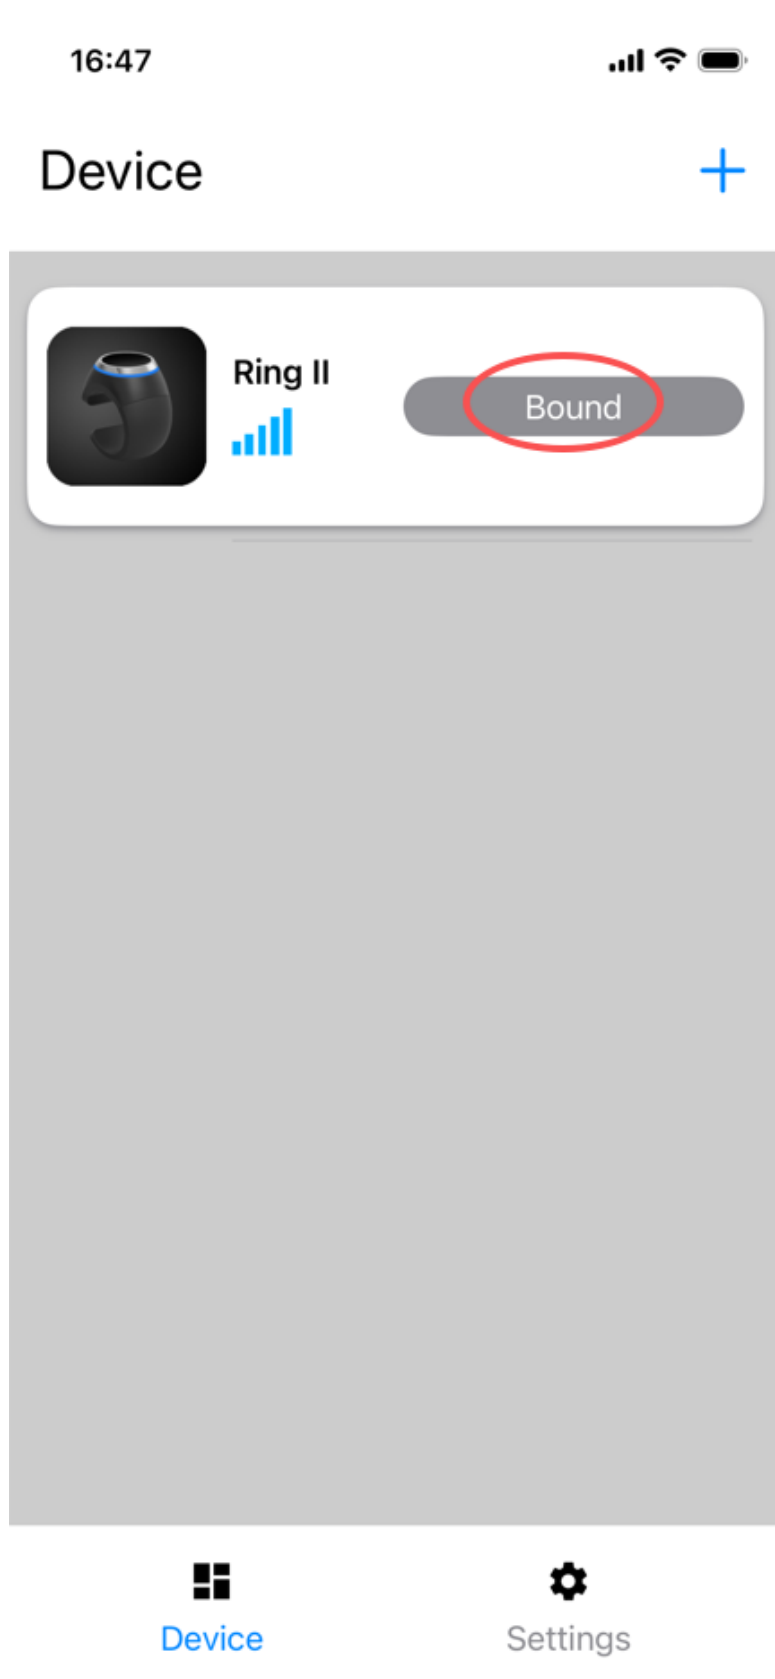

2. 点击右上角“+”按钮刷新 -> 将刷新出指环设备，点击“连接”按钮“

Tap the "+" in the top-right corner to refresh -> Tap the "Connect" button that shows up on the ring after refreshing.

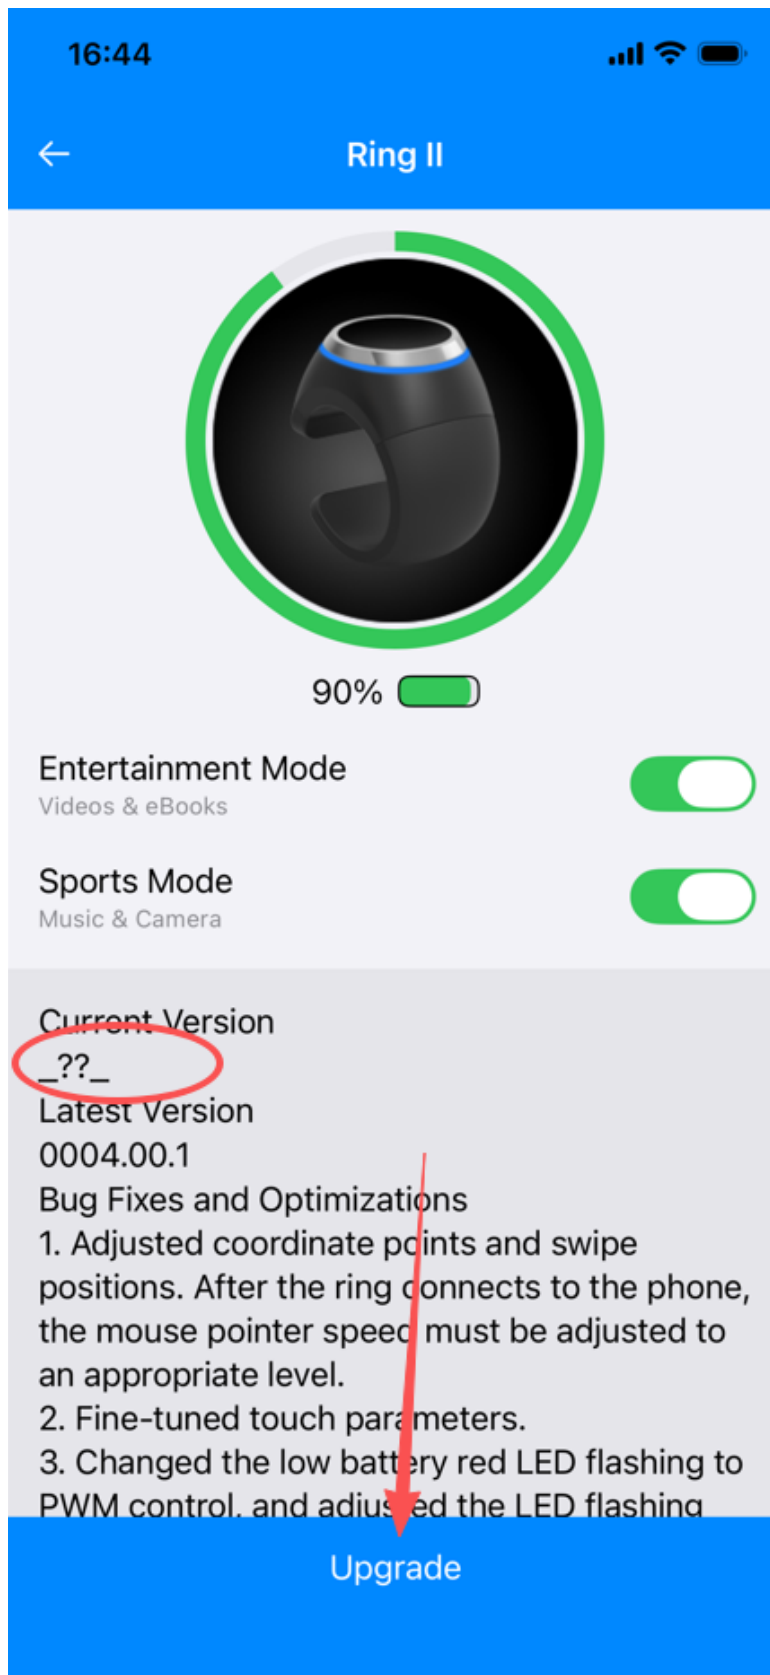

3. 自动配对成功后会显示“已绑定”，如未成功可以多重复几次上面的操作或退出 app 重新运行 app。

Once auto-pairing is successful, it will show 'Bound'. If not, try the steps above a few more times, or close and reopen the app..

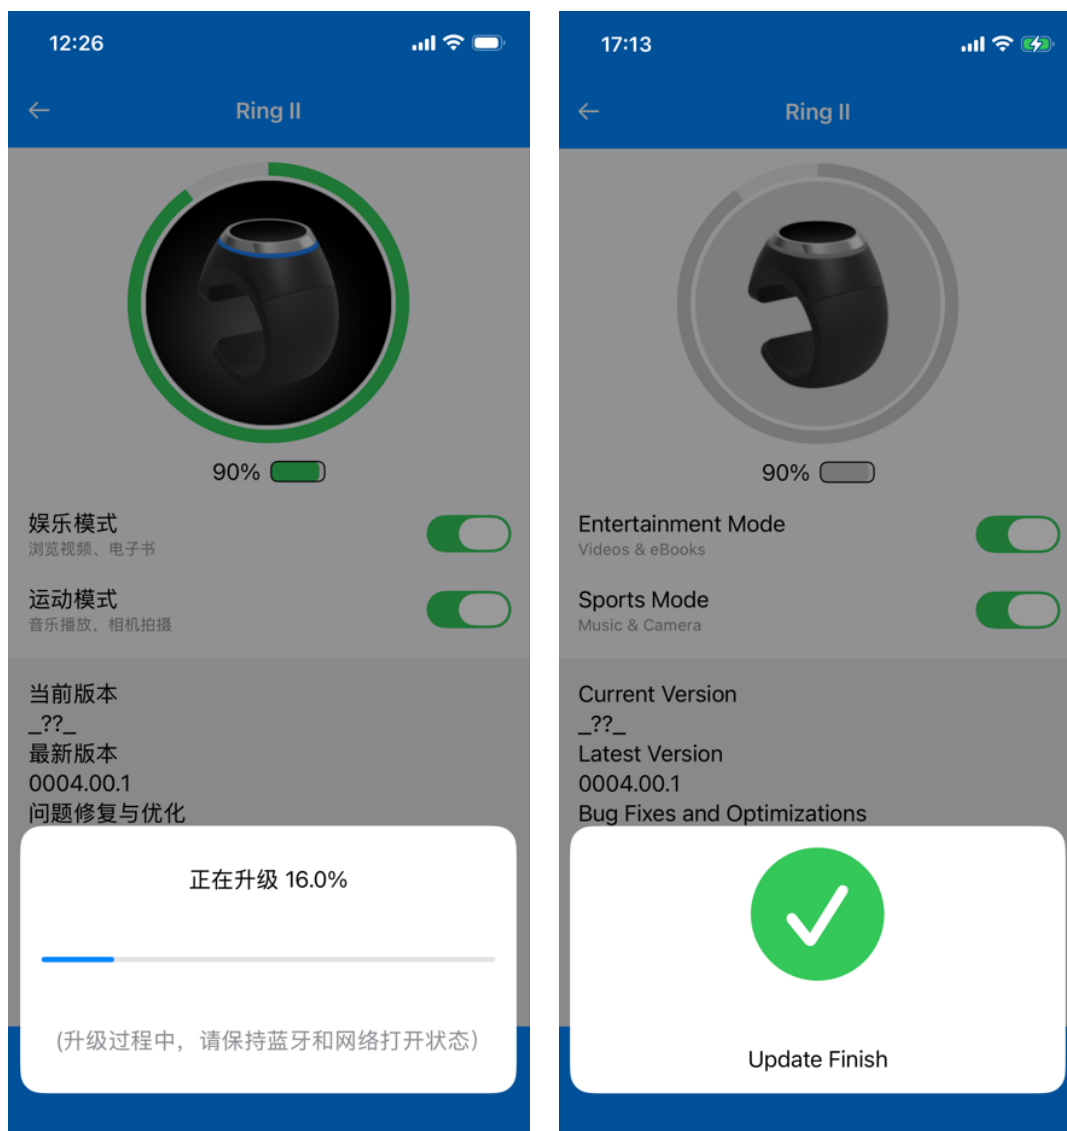

4. 点击已绑定指环进入指环操作界面 -> 点击“固件升级”

Tap the bound ring, go to the ring operation interface, and tap "Firmware Upgrade".

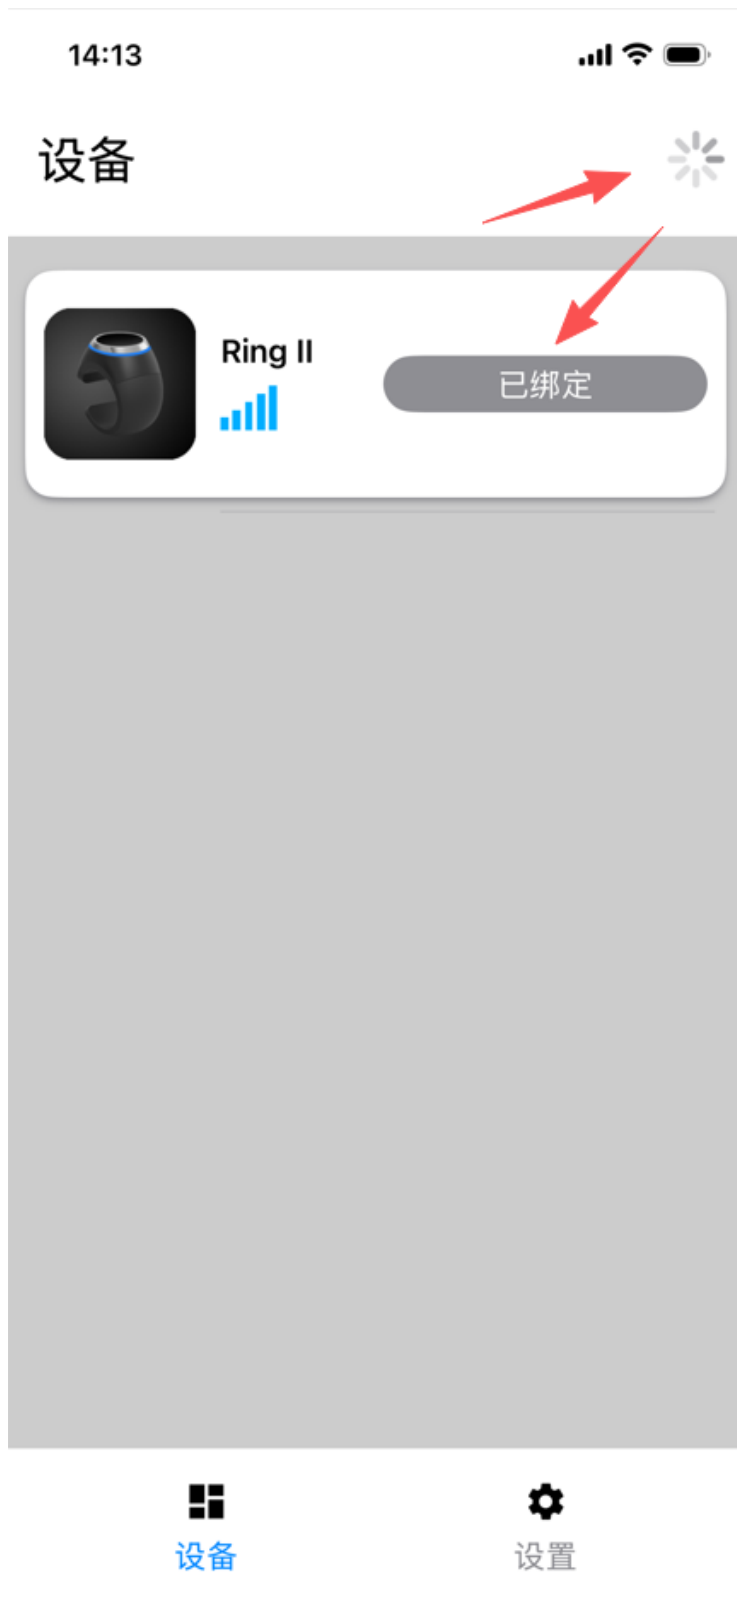

5. 等待升级完成。

Wait for the upgrade to complete.

6. 升级完成后, 返回设备页面 (点击左上角“<-”图标返回设备页面或退出 app 重新运行 app) -> 点击“+”图标刷新出已升级成功指环, 点击指环, 进入指环信息页面。

Once the upgrade is done, go back to the device page (tap "<-" at the top-left or restart the app), then tap "+" at the top-right to refresh and show the upgraded ring. Tap it to enter the ring info page.

7. 戒指现已恢复正常，固件升级成功。

The ring should now be "revived" with the firmware update successfully.
